Wg4 and the world of LEDs

The development and presentation to the market of a LED product follows various steps in which it is essential to consider the time between an LED version and the next, on average of around 8 months:

- Ideation
- Prototyping and manufacturing
- Testing
- Documentation creation
- Transfer of information to the market
- .....

OxyTech

Wg4 is the answer

Wg4 is a Web system, not only a browser, which facilitates and speeds up the **transfer of information to the market**.
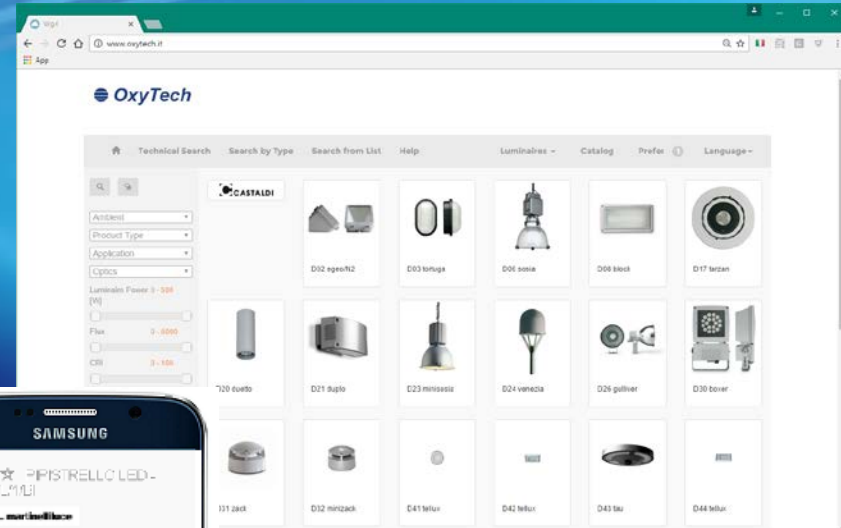

Wg4 is:

- **Essential**
- **Fast**
- **Efficient**

Wg4

Wg4 - Features

- New interface
- Developed in HTML5
- Responsive
- Multilingual (25)
- 4 search engines
- Management of favorite products

WG

⊜ OxyTech

Wg4 – Search engines

Search by Type

Search from List by code and/or description

Dynamic Technical search at 3 levels

Panoramic Search (even cross-search)

Wg4 – Other functions

Catalog selection

Product type selection

Language selection (25 languages)

Addition to Favorites List

Technical data sheet configuration

Product data sheet

Document management

Wg4: is that all?

If
that was all
Wg4
wouldn't differ from
common electronic catalogs
on the Web!
